

LETTER OF RECOMMENDATION

It's a pleasure to write this letter of recommendation for Patryk Szwermer. Patryk worked for Starcounter as a full stack developer consultant in 2017-2019. He took part in a very difficult and demanding greenfield R&D project, as well as customer projects, and helped with some of the most complex tasks. His responsibilities included software design, library design, development, documentation, test automation, integration and customer support. Patryk has shown overall very broad knowledge of C# and great learning skills for the front-end technologies that we are using (HTML, Web Components, JavaScript/ES2015, CSS3). He many times suggested architectural improvements or introduction of new solutions. As his team leader, I could witness his quick personal growth, the demand for taking challenging responsibilities and increasing capability to mentor other members of the team. It was a pleasure to work with him.

Feel free to contact me if you need further details using email marcin.warpechowski@starcounter.com or phone number +48 603 607 801.

With regards,

Marcin Warpechowski
Web Platform Team lead
